

## SOUSE OF WISDOM!!!

The father of algebra, the great Al-Khwarizmi worked in the house of wisdom. He is known for his great contributions to algebra. He even wrote a book about maths. **Wouldn't you want to see the environment the creator of algebra did his magic in?** I mean, who wouldn't? Surely everyone would. In Baghdad they are very advanced. They have the best education, healthcare, math, languages, architecture and more. In addition to this, the best workers who do the best performances are in Baghdad. **You could be taught by the best and immerse yourself in the ocean of knowledge!!!** When you return you will be the envy of all your friends/colleagues because you are so smart.

If you like souvenirs then you're in luck. Merchants from all over the world come to Baghdad, bringing glorious pieces of antique silver and gold! You can get something from France all the way in Baghdad! Merchants don't only trade objects but they trade information too. Talk about saving time...

**Enlighten yourself by being surrounded by the best books in the world....**
