

THE HOUSE OF WISDOM

Do you want to become a mathematician?

Well, in the house of wisdom there are books about algebra and more by Muhammad ibn Musa al-Khwarizmi, a scholar in the House of Wisdom in Baghdad, is along with the Greek mathematician Diophantus, known as the father of algebra.

Do you want to immerse yourself in the sea of knowledge?

For more than two centuries, it has been home to the House of Wisdom, an academy of knowledge that attracted brains from far and wide. From mathematics and astronomy to zoology, the academy is a major centre of research, thought and debate in Muslim Civilisation.

Are you interested in geography?

Muhammad al-Idrisi created this world map for Roger II of Sicily in 1154. In order to produce the work, Al-Idrisi interviewed experienced travellers. Therefore the House of wisdom is the best academy for you to come and broaden your horizon!

Do you know that other famous scholars range from incredible engineers, such as the Banu Musa brothers, who wrote the 'Book of Ingenious Devices' which describes about 100 devices and how to use them. I
