

In Baghdad, there is a lot of intelligence and learning. Here, in the house of wisdom, we invite all scholars and learners to come here and learn more about a subject and gain intelligence by reading our books we have here!

This is why you should come here:

Firstly, why you should come here is because the books are translated into many languages including Arabic, Persian, Indian, Ancient Greek and Roman texts! This is great for understanding the text and reading it better. This will also allow you to do research better since the house of wisdom is a library made for research facilities!

Here, you can learn about mathematics, science, medicine, astronomy and many other things! This is very good for people who are trying to learn about things and trying to gain intelligence as well as getting new, very important jobs.

In the house of wisdom, we also have research projects involving large groups of scholars. The caliph also constructed the first astronomical observatory in Baghdad, and research is being carried out on the circumference of the Earth. A geographic project that was commissioned led to Al-Idrisi creating one of the most detailed and accurate maps! This is how much smart scholars come here!!!

Books that are here also have interesting books such as the 'book of ingenious devices' which is a book that tells us 100 devices and how to use them and was created by the Banu Musa brothers.

The famous mathematician Al-Khwarizmi worked there and is famous for his contributions to the development of algebra!

These are the reasons why you should come to The House Of Wisdom, known as 'bayt Al-Hikma'!!!
